# Tax Analytics

Unleash the power of your data

With workloads steadily increasing and a growing need to make more strategic decisions, tax leaders are looking for ways to draw deeper insights from their data and provide new means of communicating with stakeholders.

Beyond data analysis and traditional financial statement reporting, data visualization capabilities allow you to draw new insights from your information and quickly identify areas requiring further analysis. Longview Analytics unlocks the value of data within your Longview Tax application, or any finance/enterprise application, and provides a platform for expanding well beyond.

Benefits at a Glance

✔ Efficiently identify area that require attention, deeper analysis or corrective action through highly interactive, top-down reporting
  - o   Quickly spot exceptions when performing flux analysis
  - o   Easily identify outliers through comparative trend reporting

✔ Draw deeper insights from your data, fueling improved decision making and planning
  - o   Monitor and measure key performance indicators
  - o   Focus attention on material jurisdictions and key drivers of tax positions

✔ Communicate more effectively with other stakeholders to drive improved performance across your organization
  - o   Distil reporting into key messages through effective use of data visualization
  - o   Share insights with your stakeholders and elevate the tax function into a strategic business partner

*Tables and charts allow you to spot outliers quickly*

Key Features

Pre-Built Out of Box Content
• Pre-built dashboards, reports and visualizations using best-practice design principles are easily installed and reduce implementation time to get you started quickly

Flexible Reports
• Designed for use by business professionals, enterprise-grade reports are powered by a robust Analytics engine

• Pre-built content can be modified to meet your unique requirements or designed ground-up to meet any business requirement

Pre-built reports reduce implementation time

Access Multiple Data Sources

• Access data from any enterprise or finance application in real-time through certified data connectors to systems such as SAP, Oracle, IBM and Microsoft

Share and Export

• Extract data in multiple formats through the Share and Export center including Microsoft Word, Excel, PowerPoint and PDF

• Assemble and automatically distribute report books to internal and external stakeholders at frequencies you define

Business Owned and Operated

• Intuitive, easy-to-use drag-and-drop interfaces

• Quick step wizards allow visualizations to be configured and incorporated into any dashboard or report

Design Once Run Anywhere (DORA)

• With built-in responsive design, designers can create a single application that dynamically adjusts layouts for any device including desktops, laptops, tablets and smartphones

• Reduce the effort needed to support multiple devices by 70% and greatly reduce maintenance efforts with Design Once Run Anywhere (DORA) capabilities

Longview Analytics is the solution of choice for thousands of companies around the globe looking to bring together information from across the organization. Find out more at longview.com.
